

INTERNATIONAL ISPACE DAY

Friday, February 24, 2023

Are you a space enthusiast who wants to learn more about space exploration? Are you considering a career in the space industry, or even just intrigued by the Moon and its exalted magic? Then this is your chance for direct access to this fascinating field and to take part in a memorable lunar experience! You may even find your dream job and make connections for future opportunities.

ispace EUROPE S.A. is thrilled to announce its first edition of **International ispace Day**, a career open house event to introduce ispace activities. In the context of the 'Open Door Days' series, orchestrated by the Luxembourg Space Agency to mark its fifth anniversary, the aim of this event is to raise awareness about our field of expertise, offer site tour and demonstrations, feature a variety of open or soon-to-be open positions, and, above all, meet you and learn about your professional goals in a welcoming and relaxed environment.

Event: **International ispace Day**

When: **Friday, February 24, 10:00am - 4:00pm**

Where: ispace EUROPE S.A. Offices – 5, Rue de l'Industrie, L-1811 Luxembourg (located on Paul Wurth InCub site)

Program Overview:

- 10:00am-1:00pm: 'Bring your Space A-game' – Exclusive in-person job interview sessions
- 1:00-4:00pm: 'Rovering on the Moon' – Guided tour of Manufacturing Lab, Mission Control Room, Lunar Yard, and demo sessions reserved for school groups and educational organizations

Attendance to our event is limited and by RSVP only. To register, please email us at ispace-europe@ispace-inc.com **no later than February 20** by indicating your desired participation slot ('Bring your Space A-game' or 'Rovering on the Moon').

Additional details and sign-up instructions:

- For Candidates:
We invite you to check our job openings available in Luxembourg via ispace [Career Page](#). Candidate documentation to be e-submitted to ispace-europe@ispace-inc.com at sign-up time: resume, cover letter, and (optional) references.
Interview duration: 20 minutes
- For Schools:
Maximum number of 15 participants on each tour
Visit duration: 30 minutes, departing every 15 minutes

We look forward to welcoming you on February 24. Expand our planet. Expand (y)our future.

About us:

ispace is a lunar exploration company with more than 200 staff across Japan, Europe, and the U.S.

With its ongoing first HAKUTO-R mission and planned ones, ispace has raised more than USD\$200M to build commercial lunar landers and rovers aimed at offering high-frequency and low-cost delivery service to the Moon.

ispace EUROPE S.A. is the European subsidiary of ispace, inc. and was founded in Luxembourg in 2017 to leverage the synergies between the vision of ispace and that of the Government of Luxembourg and their SpaceResources.lu initiative.

Today, ispace EUROPE S.A. is developing lunar rover technologies and data analysis capabilities that will enable the Company to provide a lunar resource exploration service.
